 LIFE GOES ON  
 NURSE  
 ORGAN DONOR

Hello. I'm Illinois Secretary of State, Jesse White. One of my duties is to inform the people of Illinois about the importance of organ and tissue donation. Here are some questions and answers to help you learn more about this important program.

**Q: WHAT IS ORGAN & TISSUE DONATION?**

**A:** It is the unique opportunity to help save lives. Organ & tissue donations are used for transplants which help save and improve people's lives.

**Q: WHO CAN BE ORGAN DONORS?**

**A:** Any person who is in good health from birth to over age 80 could become an organ donor if their loved ones give permission for donation to take place at the time of their death.

**Q: WHO RECEIVES TRANSPLANTS?**

**A:** They are given to patients on the basis of need and medical criteria. People of all ages including infants and young children may need a transplant to replace sick organs.

**Q: HOW CAN I HELP?**

**A:** You can talk to parents and family and discuss your feelings about donation. Do you know a family member or friend who has received a transplant? You can let others know about how the transplant has helped that person live and that transplants save lives!
